

MISCELLANEOUS TOOLS		
Putty knife, flexible steel		Multipurpose scraper, useful for scraping hot glue off surfaces.
Paint brushes – variety of sizes		For painting liquids onto surfaces, including paint, stains, adhesives, etc. Also good as a duster when clean.
Heat gun 300w or more power		For heating and shrinking electrical heat-shrink tubing. Can be used to heat plastics for bending.
Sandpaper		For removing small amounts of material, or finishing a rough surface. Available in sheets, with various grit from 80 (medium) to 240 (very fine) grit
Sanding pad/sponge Medium to fine grit		For removing small amounts of material, or finishing a rough surface. May be easier to grip than paper.
Wood chisel set		For wood carving. Useful for separating materials and for removing 3D printed parts.
Files		For removing burrs and small amounts of material, but more than is usually done with sandpaper.
