

Virtual Tours in Scratch: Traditional Wampanoag Homes

Shared by Meredith Peiffer and Kathy Malone, Kennedy Longfellow School, Cambridge, MA

Technology / Tools	Experience level
Scratch	beginner-intermediate

Grade Level (of this example): 3

Content Standards: Defined by teacher

Summary of Project:

Students create a virtual Wampanoag home using Scratch. They can also turn this into an interactive quiz (e.g. “Which of these objects belong in a Wampanoag home?”). Most likely this project will be done individually, though students could work in pairs. Students can easily share their work with others through Scratch. Students do not need to necessarily learn Scratch beforehand; they can learn as they go!
